

OUSSEMA JBELI

SOFTWARE & AI / DATA SCIENCE ENGINEER • DEVOPS • FULL-STACK

Béja, Tunisia | [EMAIL] | [PHONE]

LinkedIn: [LINKEDIN_URL] | GitHub: [GITHUB_URL] | Portfolio: [PORTFOLIO_URL]

PROFESSIONAL SUMMARY

Software and AI/Data Science engineer combining a completed Software Engineering degree with an ongoing AI & Data Science engineering program (graduating 2027). Experienced across the full delivery pipeline — full-stack development, CI/CD, cloud infrastructure (AWS), and microservices. Currently working professionally in DevOps at Emertek-AL and delivering production freelance projects. Strong focus on building fast, reliable, and maintainable systems.

PROFESSIONAL EXPERIENCE

DevOps / Full-Stack Engineer — Emertek-AL

2025 – Present

- **Work** across the DevOps lifecycle — building and maintaining CI/CD pipelines, containerization, and automated build, release, and deploy workflows.
- **Deploy** and manage cloud workloads on AWS EC2; contribute to cloud and microservices architecture decisions.
- **Contribute** to full-stack development and UI/UX design on client-facing products.
- **Monitor & operate** infrastructure and services using Grafana, Prometheus, Docker, and Kubernetes.

Software Development Intern — Leemcode

2023

- Hands-on application development within a professional software team; strengthened backend and full-stack skills.

Cloud Engineering Intern — Emertek

2022

- Introduction to cloud engineering fundamentals, deployment, and infrastructure work.

FREELANCE PROJECTS

Independent full-stack developer since 2023, delivering production websites and platforms for real clients.

- **BoonApp** — Large-scale real-estate platform (full-stack, live in production). [boonapp.tn]
- **EcoBoxFactory** — Product / e-commerce site for a tiny-house company (full-stack, live). [ecoboxfactory.com]
- **Tolab & Tenja7** — Online education platforms, full-stack development. [tolab · tenja7.tn]
- **Landing Pages** — Animated, responsive front-end landing pages (HTML/CSS motion).

EDUCATION

AI & Data Science Engineering (Engineer's Degree) — Iteams

2024 – 2027

- Coursework: DevOps & MLOps, data analytics, big data (Hadoop, MapReduce, Spark), Deep Learning, and NLP. Second year completed; final year 2027.

Software Engineering (Licence) — ISSAT Mateur

2021 – 2024

- First year in Information & Telecommunication Technologies (TIC), then specialized in Software Engineering (cloud and microservices architecture).
- Final-year project: full development of an AI-Toolbox application (Laravel + Vue.js).

Technical Baccalaureate (Bac Technique) — Lycée 2 Mars 1934, Béja

2021

TECHNICAL SKILLS

Languages	Java (OOP), Python, PHP, C / C++, JavaScript / TypeScript, HTML, CSS
Frameworks	Spring Boot, JavaFX, Laravel, Django, Flask, Express, Fastify, Tailwind CSS, Sass
Databases	MySQL, PostgreSQL, MongoDB, Redis
DevOps & Cloud	Docker, Kubernetes, AWS EC2, Jenkins, GitHub Actions, GitLab CI, Git, npm
Big Data & AI	Hadoop, Spark, MapReduce, Deep Learning, NLP, MLOps, data analytics
Tools	VS Code, Jira, Trello, Grafana, Prometheus, GitHub, GitLab

LANGUAGES

Arabic — Native • French — Intermediate (B1–B2) • English — Intermediate (B1, improving)
